BAUX IS FOUNDED
ON THE BELIEF
THAT BUILDING
MATERIALS
SHOULD BE
SUSTAINABLE,
SURPRISINGLY
FUNCTIONAL AND
REMARKABLY
BEAUTIFUL.

CONTACT

BAUX designs, produces and markets functional construction materials that meet the contemporary expectations of architects, engineers and builders – without compromising tomorrow's safety and environmental standards.

We deliver globally from our factories in Sweden, USA and Australia.

For support, please contact BAUX HQ in Stockholm.

BAUX Acoustic X-FELT delivers exceptional fire safety without the use of any fire treatment additives, preserving the product's sustainable integrity. By carefully selecting ultra-fine-, high-quality polyester fibres and precisely composing and processing the fibre mix, we have eliminated the key fire components: access to oxygen and fuel. This innovative approach ensures both superior fire safety and a commitment to environmental sustainability.

Wood Wool is a functional, natural material. BAUX Acoustic Wood Wool is made from two of the world's oldest building materials, wood and cement. The combination is simple and ingenious. Wood fibre offers excellent insulation, heat retention and sound absorption. Cement, a proven and popular building material, is the binder that provides strength, moisture resistance and fire protection. Therefore, BAUX Acoustic products are versatile and durable in all climates.

The new 100% bio-based BAUX Acoustic Pulp panel is the first in the world to uncompromisingly combine the performance properties of sound absorption, safety and durability with sustainability and modern aesthetics. The result is a restful and sustainable acoustical environment for residential buildings, industrial premises and public spaces that calls us back to the harmonizing pulse of nature. Harmless for us, harmless for the environment. It's nothing short of an acoustical revolution.

This is BAUX Acoustic Pulp.

The excess of unwanted plastics in the world is obvious, only a small fragment is recycled and reused into new products, a devastatingly big amount is still going to the landfill or burned to generate energy.

BAUX Recycled PET products are made from GRS certified and IOAS accredited recycled PET bottles sourced from recycling entities across Europe.

Because origin is important.
