Portfolio by Space & Function

We are a fast-growing company founded in 1989. We have grown from a furniture manufacturing business, to an international design presence, dramatically increasing our product offer across multiple product typologies.

Our design principles lead us in creating highly versatile products that spontaneously adapt to a multiplicity of contexts, styles and uses that are difficult to fit into a specific pre-established category.

Supporting you to easily navigate the totality of Arper's portfolio, with its multiple configuration options, we created the "Portfolio by Space & Function" tool. It aims at illustrating our product offering segmented by typical space situations, and correlated needs.

The Spaces & Functions we identified and illustrated are:

- — Lounge – Waiting Area
- — Break Out Area
- — Bar & Cafeteria
- — Restaurant
- — Meeting Room
- — Executive Offices
- — Workplace
- — Learning, Training & Conferencing
- — Outdoor
- — Stackable Guest chair

Please note in the tool we segmented our standard product offer. Should you have customization requests, please contact our Sales Dept. The "Portfolio by Space & Function" tool is available at the following link:

Introduction to Arper Price List

Arper Price List is a complete and comprehensive tool, including all relevant information to formulate an order. Please find below some instructions to simplify the consultation.

- 1 Product description and materials with which it is made; information on stacking characteristics (where possible) and related matching accessories (the complete list can be found on the last pages of each specific collection).
As far as sofas and upholstered items in general are concerned, seat height indicated in the price list refers to the maximum height measured in the seat center.
- 2 Prices matrix: for each article code number, the prices exclusive of VAT are shown, according to the 14 classes of upholstery available.
- 3 Technical information related to:
shipping: number of packages, weight and volume
product: fabric length / leather needed for the realization of the product with upholstery outside the price list (COM and COL)
resistance and fire retardancy testing to which the product has been subjected and validated (only available for upholstery within the Carded In programme).
- 4 Finishes available for base and shell; detailed images of elements that can be configured on the product (e.g. armrests).
- 5 Technical and environmental product certifications available.

Currency

Prices are indicated in Sweden Krone (SEK).
All prices are unit prices without VAT (excluding VAT).

in writing to Arper, citing the specifications of the fire-retardant norm with which the articles must comply.

Dimensions

The dimensions of all articles are given in centimetres (cm).

Quantity

The number of pieces per box is stated in the description of the selected item – any quantity other than that specified is not permitted.

It is not possible to combine articles of different colours and/or materials and/or structure finishes inside the same box.

Volume

The stated volume refers to the space occupied by the box(es) necessary for the selected item. It is therefore recommended that an increase of approximately 10-15% should be applied to the total volume to allow for gaps which naturally occur between cartons whilst loading.

The company reserves the right to make modifications and improvements of a technical or aesthetic nature to the product without warning.

Fire-retardancy

Arper products can be supplied treated for fire-retardancy. However, since the regulations vary from one place to another, we advise you to check up on the local regulations. Any requests for fire-retardant treatment must be sent

Consultation Guidelines

Catifa 46

Design by Lievore Altherr Molina, 2004

Chair with four-leg frame, available in chromed or powdercoated steel, or brushed stainless steel versions. The shell is available in single-colour polypropylene, bi-colour polypropylene or upholstered in hard leather grade 1 (CT) or hard leather grade 2 (CU). Versions with polypropylene shell and powdercoated or brushed base can be used outdoor. Steel armrests, also with pad, are available upon request.

Stackability:

- Up to 10 pcs. (should the weight exceed 25 kilos a handling tool must be used).
 - With trolley: up to 20 pcs.
 - CT/CU versions: max. 5 pcs. With stacking pad.
- VERSION WITH ARMRESTS STACKABILITY
- Up to 5 pcs. (should the weight exceed 25 kilos a handling tool must be used).

General Terms and Conditions of Sale

1 Application of these General Sales Conditions

The present General Terms and Conditions of Sale (GTCs) shall apply to any supply of goods by ARPER, including goods made by using components provided by the customer (COM/COL customized supplies).

These GTCs shall prevail on any ARPER customer's ("Purchaser") general terms and conditions of purchase. Any possible amendment to these GTCs shall be made in writing.

2 Finalization of Supply

Offers and promises made by any ARPER's agent or sales representative shall not be binding upon ARPER unless ARPER issues a written confirmation.

Supplies agreed with the clause "subject to availability" or similar shall be conditional upon confirmation by ARPER that the goods concerned are actually available.

Tests on components provided by the Purchaser shall not, per se, constitute acceptance of the order.

Orders placed by Purchaser shall be considered as firm after 3 (three) days from receipt, and are subject to written order confirmation by ARPER. If such confirmation is not received, this means that the order has been refused, unless ARPER has indicated its acceptance in some other way.

Should the terms & conditions in a Purchaser's order diverge from those set forth in ARPER's relevant order confirmation, the latter shall prevail (a) where said divergence is not material and Purchaser does not promptly object; (b) in any case, where Purchaser de facto starts performing its contractual obligations.

3 Delivery

Delivery shall be governed by the ICC INCOTERMS in force at the time of order confirmation.

Scheduled dates shall refer to shipment irrespective of the delivery term utilized, and shall serve as an indication only. Purchaser shall be entitled to terminate the contract failing shipment within 20 working days from relevant scheduled date. ARPER is not however liable for the payment of any damages for delayed delivery.

If the Purchaser does not take delivery on the agreed date, ARPER shall have the right to terminate the contract, to keep the goods available to the Purchaser and charge storage costs, or to arrange for its own carrier to transport the goods to the Purchaser's premises at the expense and risk of the latter.

ARPER goods are delivered suitably packed and may be delivered disassembled. Disposal of the packaging shall be the responsibility of the Purchaser.

4 Prices

The price of the goods is that indicated in the ARPER price lists in force at the time the order is placed and is net of duties, taxes, transport, assembly or similar costs.

5 Payment

Unless otherwise agreed, payment shall be made directly to ARPER, together with the purchase order.

In the event of late or non-payment, ARPER may terminate the contract by written communication to that effect. Interest for late payment will be charged at the ECB reference rate plus 12 points.

Until full payment has been made, the goods remain the property of ARPER, which has the right to take them back. Unless otherwise legally ruled, the reservation of title extends to the proceeds of any resale of the goods to third parties.

6 Non-conformity

ARPER goods are made in conformity with EU standards; any other requirements must be agreed in writing. Descriptions of goods in ARPER catalogues or other illustrative publications are given as an approximate indication and any divergences may not be considered as non-conformity. Conformity to a sample, if specified, must take into account the tolerances inherent in the use of natural materials (such as hide, leather, wool, wood, etc.) which do not give uniform results.

Save what provided under section 7 below (warranty), Purchaser loses the right to rely on a lack of conformity of the goods if he does not give written notice to ARPER — specifying the nature of alleged lack of conformity and providing ARPER with pictures of satisfying details and evidence of reservations, if any, made upon taking delivery — within eight days after he has discovered it or ought to have discovered it and, in any event, within two months from the date on which the goods were actually handed over to Purchaser. ARPER shall repair or replace free of charge any non-conforming goods; ARPER shall bear no further liability whatsoever. Neither return of goods, nor price reduction is allowed unless authorized in writing by ARPER.

General Terms and Conditions of Sale

7 Warranty

Subject to the provisions therein, ARPER shall guarantee that their goods will maintain their characteristics for a period of five years (reduced to two for electric/electronic components) from the date of delivery as per section 3 above,

Any extension of this guarantee period shall be against a surcharge, to be agreed between the parties.

The present warranty shall not apply to:

- any component supplied by Purchaser, or by a third party upon Purchaser's request;
- goods whose price is not fully paid.

The present warranty shall not apply to alterations caused by:

- normal wear and tear;
- imperfections, changes, and normal tolerances of natural materials and fibres (covers loss of elasticity included);
- assembling, utilization, or maintenance not conforming to indications as per relevant Products Sheet (e.g. stacking without proper stacking pad);
- abnormal, not previously agreed upon utilization (e.g. in unusual environmental conditions, or task chairs utilized more than 8 hours/day for 220 days a year);
- user's reckless behavior (e.g. scratches, or coloring due to user's clothes such as blue denim, or metal studs).

A request for warranty intervention is to be filed in accordance with the procedure set by ARPER, and ARPER is to be granted access to any claimed goods.

In all cases where the present guarantee applies, ARPER shall at its option either:

- replace the guaranteed goods. Should the goods be guaranteed for more than two years, Purchaser shall pay a contribution of 40%, 60%, or 80% of their original purchase price, if intervention is requested respectively in the 3rd, 4th, or 5th year; or
 - (ii) to pay Purchaser a compensation equal to the purchase price. Should the goods be guaranteed for more than two years, said compensation shall be reduced to 60%, 40%, and 20% of their purchase price, if intervention is requested respectively in the 3rd, 4th, or 5th year.
- ARPER shall bear no further liability. Purchaser shall waive any right of redress against ARPER deriving from Purchaser's liability towards a consumer.

8 Manufacturer's liability

The Purchaser is obliged to inform their customers and other individuals further down the goods distribution chain of the usage characteristics of these goods in order to minimize the risk of improper use which might expose ARPER to claims under manufacturer's liability. Failing this, the Purchaser shall exonerate ARPER from any liability.

9 ARPER's intellectual and industrial property rights

Any of ARPER's production and/or commercial technology, whether patented or not, which is not in the public domain and which comes to the knowledge of the Purchaser shall be treated by the latter as confidential and shall not be used or divulged in any way without written permission from ARPER. The Purchaser is required not to register or use distinctive marks that are similar or identical to those used by ARPER.

10 Disputes and applicable rules

DISPUTES. Any disputes relating to either this GTCs, and any transactions governed by it shall the same be finally settled in compliance with the QUADRAADR Rules (www.adrquadra.com). Notwithstanding the above, ARPER shall be entitled to address either the Treviso court, or the competent court in the Purchaser's jurisdiction in order to obtain an ex parte payment order in respect of any unpaid supplied goods.

RULES. For anything not specified herein, the Vienna 1980 Convention on International Sale of Goods and, subordinately, the Unidroit Principles on International Commercial Contracts (latest version) shall apply.

N.B. Purchaser acknowledges that ARPER has adopted, and implemented a scheme for its organization, management, and control ("Model 231") in compliance with legislative decree no. 231 of June 8th, 2001. Purchaser declares to have read and fully understood the Ethical Code and the Model 231 as available in ARPER website (www.arper.com) and hereby declares to comply with the principles and content therein.

Leather finishes

The leather upholstery offer consists of the following program:

Elmosoft leather

Semi-aniline leather Chrome free

Leather

Soft leather

Pigmented leather

Elmocoast leather

Pigmented leather

Semi-aniline leather combines naturalness, comfort and durability. The surface of this leather is treated with a lightweight coat of color that increases its wear resistance, preserving its natural look with a soft and pleasing feel.

Elmosoft leather: soft and flexible semi-aniline leather. Its softness and breathability, coupled with a durability and an extremely wide color range, make it suitable both for contract and residential sectors.

Pigmented leather in terms of manufacture, the leather undergoes the same processes as aniline or semi-aniline leather, with additional dyeing and finishing treatments to meet different needs in terms of comfort, softness to the touch, strength, durability and color. Its wear resistance and ease of cleaning make it suitable for many uses.

Soft leather: leather characterized by a smooth and uniform surface, soft to the touch with a delicate and natural grain, which lends it a particularly elegant feel.

Neocoast leather: leather characterized by a uniform surface, with a light grain and a soft feel, available in a wide range of shades.

Leather finishes

Natural characteristics:

Leather and hard leather may show marks and imperfections such as wrinkles, veins, differences in color from one batch to another. These are distinctive features that distinguish genuine leathers and their natural beauty, ensuring the authenticity of the material and the unique comfort that only a natural product can offer.

Also our leather samples reflect this variability, both among different types of leathers and for the same type of leather, changing the shades of color and their natural features.

Any samples, supplied on request with reference to individual orders, are not to be considered as a guarantee of perfect homogeneity between sample and actual supply.

In this respect, the characteristics listed below are intended to be compliant with Arper quality standards and shall not constitute a ground for disputing products:

Grain variations example

Backbone example

— Grain variations: areas of the leather where grain can be coarse, for example the part of the leather between the side and the belly.

— Wrinkles, veins and stretch marks: they have a width of about 3-4 mm, with a slightly rougher grain in the surrounding area. They are more visible against the light.

— Backbone: back part of the animal, where the skin is the most valuable as it is the thickest and most compact part. It can have wrinkles.

— Insect bites: small marks on the surface of the leather due to different types of insect bites.

Wrinkles, veins and stretch marks example

Insect bites example

Cleaning and maintenance:

Avoid exposure of the products to direct sunlight: it can alter the color of upholstery.

Avoid exposure to heat sources.

Dust the leather regularly with a soft dry cloth.

Any stain can be removed using a cloth dampened with water and neutral soap. Do not rub, but gently dab from the edge towards the center of the stain. Dry immediately after treatment.

General conditions for COM/COL customised supplies

Before accepting a customised order using materials provided by the customer, Arper SPA requires a sample of fabric/leather to be submitted DDP (Delivered Duty Paid), together with the duly completed materials chart for a preliminary evaluation of feasibility. For plain color fabrics, the sample must have a size of at least 400 mm x 300 mm; if the fabric features a decorative pattern, the customer is required to contact Arper SPA to ask for the exact size of the sample to send.

If the result of the preliminary test on the fabric/leather sample is not conclusive, Arper SPA will ask the customer to supply a sufficient quantity of material to produce a complete sample, which will then be invoiced in the normal way and sent to the customer for evaluation in accordance with a procedure to be agreed.

The information obtained during the experimentation phase might lead to a request for additional quantities of material and/or lengthening of delivery times. The initial estimate prepared by Arper SPA or the COM/COL list price will be increased by 10% if the customer's order is for less than 8 pieces or if the material supplied does not conform with Arper's product characteristics, resulting in inefficient production.

Arper SPA will not accept any despatch of COM/COL material until the order with relative indication of the quantity of covering material has been accepted.

If the covering material is sent by any delivery method other than DDP (Delivered Duty Paid), Arper reserves the right to reject the material or increase its charge to the customer.

The customer's own fabric must always be sent along with the related invoice, in order to complete the administration procedures connected to product realization and, for products intended for the foreign market, to comply with the necessary customs clearance procedures.

Even if COM/COL is accepted, Arper SPA shall in no way be responsible for the appearance, durability, brightness of colours or any other type of quality problem encountered with the material. The responsibility of Arper SPA is limited to any defects directly attributable to the work performed and warranty will not be extended to the technical performance and/or aesthetic results obtained with non standard materials.

Arper SPA does not accept COM with fabric already listed in the Recapitulations table.

The reported measures refer to bielastic fabrics with solid colour.

For different types of fabrics (monoelastic, print, etc.) requirements and prices will be evaluated upon request.

Catifa 46 / Catifa 53

Design by Lievore Altherr Molina

2009

clip-it.easy®

Arper designed and patented a new fixing system for the Catifa 46 and Catifa 53 shells making these two models even more suitable for the contract segment. The new clip-it-easy® system is based on a prestressed steel spring fixed directly onto the bases (with or without fixing plate) of the Catifa 46 and Catifa 53 collections without modifying the original Design by of the shell.

This solution offers many advantages such as:

- No shell treatment required;
- Easy to assemble;
- Elimination of any friction between the polypropylene shell and the metal frame (= increased product lifetime)

Thanks to the clip-it-easy® system, expressing Arper's attention to continuous product quality improvement, Catifa 46 and Catifa 53 are proving increasingly suitable for spaces involving intensive use of furniture (canteens, offices, contract sector).

For the video and the PDF file on the assembly instructions of Catifa 46 and Catifa 53 please visit our website:

Flame Resistance Regulations – Product Requirements

— Italian market

Approved products in Class 1 or 2 or in Class 1IM (M.D. 26/06/84): see notes on page of the relevant article

— US market

All Carded-IN coverings available for the US market are compliant with local regulations: TB117-2013 and San Francisco Regulation (AB2998)

— UK market

All products are available with polyurethane padding compliant with BS5852 Crib 5 (for products that can be configured in both 'STD' and 'IGN' versions, the IGN version must be selected).

All coatings Carded-IN (fabrics, vinyl fabrics, leathers) are compliant with BS5852 Sch. 4 Part.1 Cigarette test “worst case”: the laboratory tests the cover over a filling that is either worse than any that is used or is the worst that can be used by a producer. A positive test result therefore indicates that the covering is compliant when used with padding with superior flame resistance.

— All markets

Due to difficulties linked to the coexistence of mandatory and voluntary standards on flame resistance and the differences between the various standards and test methods depending on the country, the intended use and the type of material,.... Please contact customer service for a detailed analysis.

Kinesit Met

Design by Lievore Altherr Molina, 2021

Chair with powder coated aluminum 5 way swivel base on self-braking castors (black, available for hard and soft floors), fitted with gas-lift mechanism for height adjustment. Seat with built-in self-tensioning weight response mechanism, backrest with 3-position recline, adjustable lumbar support breathing up to 60 mm. Mid-backrest and seat both with fabric, leather, coated fabric or customer's own material. On request and with an additional charge, fixed aluminium armrests are available in the same finishes as the base and the seat and backrest can be made using different shades of the same cover.
